Q: Django 1.7: When attempting to upload an image through my admin interface, I get the following error: It also happens to any other file types I try to upload through the admin interface. It works fine when I run it from the terminal using python manage.py runserver and connect via the terminal. [django-1.7.2] Python 2.7.6 (default, Nov 10 2015, 15:04:48) [MSC v.1500 64 bit (AMD64)] [GCC 4.2.1 (Apple Inc. build 5666) (dot 3)] 127.0.0.1 ::1 Here is what I'm doing: Opened up a new Django project Installed all the modules I need Created an admin.py file and setup my models Inside of my models.py file I have the following: from django.db import models # Create your models here. class Test(models.Model): name = models.CharField(max_length=200) image = models.ImageField(blank=True) def __str__(self): return self.name Finally, here is what is displayed in my admin.py file: from django.contrib import admin from myapp.models import Test # Register your models here. admin.site.register(Test) I'm assuming it has something to do with the fact that I haven't created my media folder yet. However, whenever I add media folder to my root directory and type python manage.py runserver, it works fine. Any help? A: My problem was that I had the file system path to my media folder set to "media" while my urls.py file was set to "media/". Once I changed the file system path, everything worked fine.
