A- Nicktoons: Glitched Out Roadtrip Nicktoons: Glitched Out Roadtrip is an action adventure game by Big Head Studios and created by Alex Evans and Andrew Einhorn. It was developed for WiiWare and released on November 4, 2008. The game is centered around the traveling adventures of two characters for the purpose of exploring the game's setting. Players are tasked with rescuing two other characters who are stuck in the game. This is the first title of a planned trilogy. Gameplay Nicktoons: Glitched Out Roadtrip contains action-adventure elements which consist of gameplay in 3D. Players are given a choice to explore the game's environments in search of objects and challenges. Players can choose to investigate doors, interact with objects, or simply run around for a short time. Once players find a door, they can open it or open it by using a character's ability to jump into and out of boxes. Players can use boxes for various other purposes such as jumping into them to jump onto higher ground, jumping into them to push away solid objects to clear their path, or jumping into them to create a small area to navigate through. Players are tasked with rescuing characters who are stuck inside various objects throughout the game. However, players need to seek out special keys in order to rescue them. In order to find these keys, players must explore the environment to find either a red button that can open a locked door, a green candle that opens a locked door, or a light switch that opens a locked door. Once a character is rescued, they are freed from their trap in their current location and are able to leave the location immediately. However, players have a limited amount of time to find keys, so they can only use them once. If they do not find the keys during their time limit, they are unable to rescue their companion and will be stuck in their current location. Throughout their travels, players will encounter boxes that they can use to navigate the game. Players must use the characters' abilities to survive. During the course of the game, players will gain upgrades for their characters. While certain upgrades are based on how much time players have to find their companion, other upgrades are acquired via
